NFC Business Card

Description

Equipped with near-field communication (NFC), your business card can now deliver your contact information, social networks, video, websites, and so much more, straight to any smartphone. You can easily customize and update the information you send to your clients and prospects.

Benefits of using NFC Business Cards

- Instant Connection
- Wireless Information Exchange
- Good Security Standards
- No need for Wi-Fi, 3G or LTE
- Eco-Friendliness
- Easy of Setup & Affordability

What will be stored on your Card?

- All the same contact details that are stored on your mobile device (Don't forget to include keywords describing your business which make it easier for your potential customers to find you in their phone)
- Your social media profiles
- Website links
- A QR code linked to your details

NFC Business Card

Share with a Single Tap On The Go!

All your company contact details including addresses and directions.

Your social media profiles

Website links

A QR code linked to your details

We have added a Keywords section where you add keywords pertaining to your business to help your clients find you on their phones.

Use your analytics dashboard to monitor how many times your card was tapped and where.

Login to Your Dashboard to Manage your Profile

Your username and password will give you access to update all your contact details, logo and change the look and feel of your tap page.
